

Hello Bere!

I hope you are very well and that everything is excellent in the hospital where you work. To be honest, these last few days I have been concerned about the health of my pet, Richy. You have known it since it was born and you know that it is always very happy and playful, but this week it has been sleeping a lot and it doesn't want to eat, clearly something is wrong with it.

Naturally I took it to the vet and there they did medical studies, however that day it was normal, it didn't appear to be sick. Anyway when we got home it went to sleep. In fact, when I wanted to take it out for a walk, it didn't want to get up.

What do you think could be happening? What do you recommend me to do? You are my best friend and you always have a solution for all problems, I trust you and I know that you will help me.

I send you a hug. I love you!
